# Preface

All aspects of oil and gas operations in the Yukon and Northwest Territories are administered by the Department of Indian and Northern Affairs, specifically by the Northern Non-Renewable Resources Branch.

Information on geological and geophysical operations and associated research programs is submitted by operators pursuant to Sections 28 and 53 of the Canada Oil and Gas Land Regulations. Information on well drilling is submitted pursuant to Part X of the Canada Oil and Gas Drilling Regulations.

All permittee/lessee information is released pursuant to Section 106 of the Canada Oil and Gas Land Regulations.

Bill C-48, cited as the Canada Oil and Gas Act, will introduce a shorter period of confidentiality for geological and geophysical reports submitted by oil operators. On promulgation of this Act a supplement to this report will be compiled listing all the additional reports released from confidential status.

## Microfilm

The Northern Non-Renewable Resources Branch routinely has all technical reports submitted by operators microfilmed.

The microfilm copies of reports released from confidential status are available at a cost of \$1.20 per microfiche from:

Oil and Gas Exploratory Operations Section  
Northern Non-Renewable Resources Branch  
Dept. of Indian and Northern Affairs  
P.O. Box 2638  
Station 'M'  
Calgary, Alberta T2P 3C1

Prepayment of orders, by cheque or money order made payable to the Receiver General for Canada, is requested.

# Préface

Le ministère des Affaires indiennes et du Nord canadien voit à l'administration de tous les aspects des activités pétrolières et gazières dans les Territoires du Nord-Ouest et au Yukon, notamment par l'intermédiaire de la Direction des ressources non renouvelables du Nord.

Les exploitants fournissent des renseignements concernant leurs activités géologiques et géophysiques, et les programmes de recherche qui s'y rattachent, conformément aux articles 28 et 53 du Règlement sur les terres pétrolifères et gazifères du Canada. Les données sur les forages de puits sont transmises conformément à la partie X du Règlement sur le forage des puits de pétrole et de gaz au Canada.

Tous les renseignements communiqués par les titulaires de permis et de concessions sont diffusés conformément à l'article 106 du Règlement sur les terres pétrolifères et gazifères du Canada.

Le projet de loi C-48, cité sous le nom de Loi sur le pétrole et le gaz du Canada, prévoit une période de secret plus courte en ce qui touche les rapports géologiques et géophysiques présentés par les exploitants pétroliers. Lorsque cette loi aura été adoptée, on publiera un supplément au présent rapport, lequel contiendra la liste de tous les autres rapports ainsi rendus publics.

## Microfilm

La Direction des ressources non renouvelables du Nord procède à la reproduction sur microfilm de tous les rapports techniques soumis par les exploitants.

On peut obtenir une copie sur microfilm de tous les rapports publics, à raison de 1,20\$ la microfiche, en s'adressant au service suivant:  
Section des opérations de prospection pétrolière et gazière  
Direction des ressources non renouvelables du Nord  
Ministère des Affaires indiennes et du Nord canadien

Les commandes doivent être accompagnées d'un chèque ou d'un mandat à l'ordre du Receveur général du Canada.

## Computer Information Retrieval

The Oil and Gas Resources Evaluation Division has completed computer conversion of basic information on all exploratory programs carried out in the Yukon and Northwest Territories. The computer retrievable data consist of:

- 1 Report Number
- 2 Report Title
- 3 Identification of the Type of Data contained in the Report
- 4 Statistical Information
- 5 Location of the work reported on (by geological province, grid area, or lease or permit number.

The Division is prepared to carry out computer searches for companies, in order to identify specific data available within specified geographical boundaries and to provide statistical data as required. This service operates on a cost recovery basis.

For further information contact:

The Oil and Gas Resources Evaluation Division and Oil and Gas Engineering Division are in the process of developing a computer system for engineering data on wells drilled in the Yukon and Northwest Territories. This system is planned for full operation by mid-1981.

It is the intent of this Department to share the data contained in this system with industry. Further details will be announced as plans progress.

Potential users of this system are invited to submit any questions or suggestions on this system to the above address.

This edition of the Oil and Gas Technical Reports supercedes all previous editions.

## Récupération informatisée des données

La Division de l'évaluation des ressources pétrolières et gazières a terminé l'informatisation des données de base concernant tous les programmes d'exploration réalisés dans les Territoires du Nord-Ouest et au Yukon. L'ensemble des renseignements comprend:

1. le numéro du rapport;
2. le titre du rapport;
3. l'identification de la nature des données contenues dans le rapport;
4. des renseignements statistiques;
5. la zone de travail visée par le rapport (selon la province géologique, le graticule ou le numéro de concession ou de permis).

Sur demande, la division interrogera son système informatisé, pour le compte des exploitants, en vue de préciser les données disponibles sur des zones particulières et fournir les renseignements statistiques requis. Le requérant devra payer le coût de ce service.

Pour obtenir de plus amples renseignements, s'adresser à la:  
Direction des ressources non renouvelables du Nord  
Ministère des Affaires indiennes et du Nord canadien  
Ottawa (Ontario) K1A OH4  
a/s de: M. S.A. Kanik  
ou  
M. R.W. Klaubert  
N° de téléphone: 819-997-9444

La Division de l'évaluation des ressources pétrolières et gazières et la Division du génie pétrolier et gazier travaillent à l'élaboration d'un système informatisé pour consigner les données techniques concernant les puits forés dans les Territoires du Nord-Ouest et au Yukon. Ce système devrait fonctionner intégralement vers le milieu de 1981.

Le Ministère se propose de mettre les renseignements contenus dans ce système à la disposition de l'industrie. Des indications plus précises à ce sujet seront communiquées au fur et à mesure qu'avanceront les travaux.

Les personnes intéressées à utiliser ce système sont invitées à faire part de leurs questions ou de leurs suggestions pertinentes, à l'adresse donnée plus haut.

Cette édition remplace toutes les autres.

## Section 1 – Geological, Geophysical and Research Reports

Geological, geophysical and research reports are released from confidential status pursuant to Section 106 of the Canada Oil and Gas Land Regulations.

These reports are open for inspection and perusal only at the following office.

Oil and Gas Exploratory Operations Section  
Dept. of Indian and Northern Affairs  
220 – 4th Avenue S.E.  
Room 482, Government of Canada Building  
Calgary, Alberta

Contact: T. Stalinski  
Phone: 403-231-5631.

Microfilm copies of these reports are also available for perusal or purchase at this office, as described in the preface to this report.

The organization of this report has been changed in this edition.

The following hierarchy has been used:

**1 Geological Province** – see Table 1 for detailed descriptions of the geological provinces.

**2 Work Category** – the various types of exploratory work have been grouped as follows:

- a. *Geological* – includes surface geologic mapping, photogeologic interpretation, geological evaluation, geochemical surveys, and underwater geological projects;
- b. *Geophysical* (land and air-borne) – includes land-type seismic surveys (including on-ice), aeromagnetometer and gravity meter surveys, and geophysical research projects;
- c. *Marine seismic* – marine seismic surveys (ship-borne);
- d. *Research* – includes all the various types of studies and research not directly related to geological or geophysical exploration.

**3 Operator** – the code number assigned to the company operating the program. (See Appendix I for an alphabetic index and Appendix II for a numeric index to the operator codes).

**4 Type of Work** – the specific type of work performed (see Table 2 for an explanation of these codes).

**5 Sequence Number** – the report sequence number for each operator as described below.

## Première partie – Rapports géologiques, géophysiques et de recherche

Les rapports géologiques et géophysiques de même que de recherche sont rendus publics conformément à l'article 106 du Règlement sur les terres pétrolifères et gazifères du Canada.

On peut examiner et consulter ces ouvrages uniquement à l'adresse suivante:

Section des opérations de prospection pétrolière et gazière  
Ministère des Affaires indiennes et du Nord canadien  
Pièce 482, Immeuble du gouvernement du Canada  
220, 4<sup>e</sup> Avenue S.-E.  
Calgary (Alberta)  
a/s de M. T. Stalinski  
N<sup>o</sup> de téléphone: 403-231-5631

On peut aussi consulter ou acheter des exemplaires de ces rapports, sur microfilm, à ce même bureau, comme il a déjà été dit dans les pages qui précèdent.

On constatera que la structure du rapport a été légèrement modifiée dans cette édition.

L'ordre suivant a été retenu:

**1 Province géologique:** voir le tableau 1, qui donne une description détaillée des provinces géologiques.

**2 Nature du travail:** les divers travaux d'exploration ont été regroupés sous les rubriques suivantes:

- a. travaux géologiques: ceci comprend les travaux de cartographie géologique de la surface, l'interprétation photogéologique, l'évaluation géologique, les levés géochimiques et les travaux géologiques sous-marins;
- b. travaux géophysiques (terrestres et aériens): ceci englobe les levés sismiques terrestres (y compris ceux faits sur la glace), les études aéromagnétiques et gravimétriques de même que les travaux de recherche géophysique;
- c. études sismiques marines: les levés sismiques en mer (faits à partir de navire);
- d. travaux de recherche: ceci inclut les diverses études et recherches qui ne sont pas reliées directement à l'exploration géologique ou géophysique.

**3 Exploitant:** le numéro de code attribué à l'entreprise qui met en oeuvre le programme (voir l'annexe I, index alphabétique des codes des exploitants et l'annexe II, index numérique des codes des exploitants).

**4 Nature du travail:** le genre d'activité spécifique réalisée (voir le tableau 2 pour obtenir une explication de ces codes).

**5 Numérotation:** l'ordre numérique des rapports, pour chaque exploitant, tel que décrit ci-après.

## Report Numbers

Each report submitted to the Department has been identified by a report number. The report number identifies the company, the type of work carried out, the geological area in which the work was done, and a sequence number. For example:

Report Number 007-06-07-00098

- 007 identifies the operator or company (see Appendices I and II).
- 06 identifies the type of work (see Table 2).
- 07 identifies the geological area in which the work was done (see Table 1).
- 00098 numerical sequence of reports as received from this company

## Numérotation des rapports

Un numéro a été attribué à chaque rapport soumis au Ministère. Il permet d'identifier l'entreprise, la nature du travail effectué, la région géologique ainsi qu'un numéro de classement. Par exemple, si on prend le numéro de rapport 007-06-07-00098,

- 007 désigne l'exploitant ou l'entreprise (voir les annexes I et II);
- 06 détermine la nature du travail (voir le tableau 2);
- 07 précise la région géologique où le travail a été exécuté (voir le tableau 1);
- 00098 correspond au numéro de classement attribué aux rapports fournis par cette entreprise.
